

# The Nerve Tour

## 2023-2024 with Gil Hedley

*gilhedley.com*  
Dedicated to exploring inner space™ 

**Gil is embarking on a one of a kind, 111-city tour of the United States and Canada to share his uniquely uplifting and informative presentation, “The Nerve Project: Exploring the Nerve Tree in Relationship.”**

Experience Gil’s current findings from the anatomy lab that reveal the integral and extraordinary nature of the nervous tissues: brain, spinal cord, musculoskeletal plexuses, autonomic plexuses, vagus nerve...and much more.

Essential education for bodyworkers, Pilates teachers, chiropractors, yoga teachers, personal trainers, osteopaths ~ and anyone with a passion for the human form.

Gil has worked for the past 30 years in the dissection lab, and this is the first dissection of its kind to be documented in images and video from the characteristically integral perspective for which Gil is best known.
